

Lakshaya L.

Data Science Professional & Analyst

Email: lakshaya.l.datasci@gmail.com Phone: +91 98765 43210 Location: Chennai, India

LinkedIn: linkedin.com/in/lakshaya-l-ds

PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Science professional with practical experience in building predictive models, data visualization, and automated data extraction. Proficient in transforming raw datasets into actionable executive insights utilizing advanced statistical methods and modern business intelligence tools.

EXPERIENCE

Data Visualization Associate (Remote Internship)

Excelerate Solutions

June 2026 – Present

- Design and deploy interactive, production-ready marketing and operational dashboards using Looker Studio and Google Data Studio.
- Clean and structure multi-source business data streams to optimize report load performance and visualization responsiveness.
- Collaborate closely with remote engineering teams to map metrics, automate report generation, and deliver KPI insights directly to stakeholders.

Independent AI & Data Specialist (Academic & Hackathons)

Autonomous Projects

Ongoing

- Designed and developed an AI-powered **Counterfeit Medicine Detector** leveraging image verification, batch number parsing, and barcode verification algorithms to validate pharmaceutical authenticity.
- Engineered highly optimized data extraction scripts leveraging AI APIs and Python to parse unstructured web data into structured analysis frameworks.
- Implemented optimal search strategies, classification algorithms, and decision trees for complex predictive analytics tasks.

KEY PROJECTS

Pharmaceutical Authentication System

2026

- Built a comprehensive hackathon project designed to detect counterfeit drugs using multi-modal validation parameters. Implemented OCR text mining for batch records alongside automated barcode parsing logic.

EDUCATION

B.S. in Data Science

IIT Madras

Graduation: 2027

B.Tech Program

SRM Institute of Science and Technology

TECHNICAL SKILLS

Languages & Core:

Python, SQL, Advanced Data Structures & Algorithms

Data Science & AI:

Machine Learning, Predictive Modeling, Regression, KNN, K-Means Clustering, State Space Search, Decision Trees

Data Visualization:

Looker Studio, Google Data Studio, Data Dashboards

Developer Tools:

Git, GitHub, AI Web APIs, Automation Scripts

CERTIFICATIONS

Python Coder Certification

Verified Skill Badge

Predictive Modeling & Analytics

Regression, KNN, and K-Means Specialization

Data Visualization Associate

Excelerate Early Career Credential

Two-Pointer Algorithmic Optimization Suite

2026

- Developed a high-efficiency text analysis tool optimized specifically via two-pointer techniques to process large-scale textual sequences for symmetrical pattern and palindrome detection.
